DO IT RIGHT... DO IT ONCE WITH BAKOR

WATERPROOFING

ROOFING

AIR BARRIERS

www.bakor.com

Bakor Blueskin® ROOF RF 200 Self-Adhesive Roof Underlayment is easy to use and prevents leaks by providing a waterproof barrier between shingles or metal roofing and the roof deck.

Flexible release film rolls up to a tight ball for easy disposal

Aggressive adhesive layer

Split-film release for fast and easy application

SBS polymer seals around nails and screws

Lightweight and easy to carry

Flat core for easy disposal

Cool blue colour reflects heat

The best anti-slip surface available

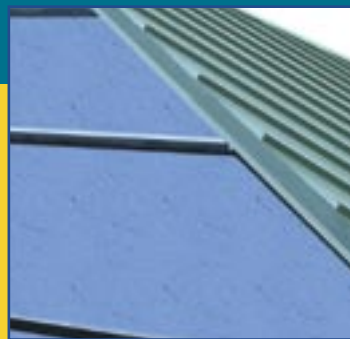

Anti-Slip Surface

- Features a unique anti-slip poly surface providing extra safety

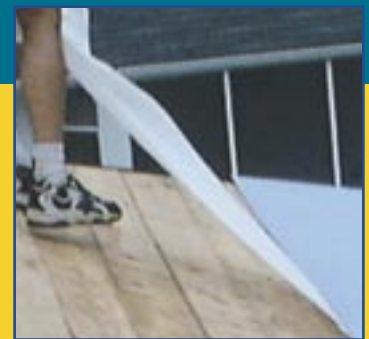

Self-Sealing

- SBS polymer seals around nails and screws, eliminating costly call backs

Versatile Roof Underlayment

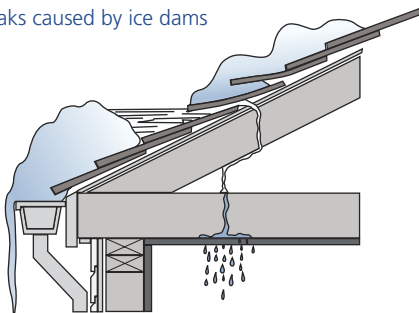

- Serves as a water, air/vapour barrier under metal roofing
- Non-abrasive surface under metal roofs

Quick Application

- The only self-adhesive underlayment with split-film release
- Saves time and money

Leaks caused by ice dams

Not covered by shingle warranties

It is recommended that the entire roof be covered by Bakor Blueskin® ROOF RF 200, especially where high snow loads or heavy rains are expected.

Leaks caused by wind driven rain

Look to Bakor, with its leading position in self-adhesive bitumen technology, for solutions in Roofing, Waterproofing and Air Barriers.
