

Notes

1. Blueskin WP 200 is a fast setting sealant. A 3/4"x3/4" fillet is formed where the foundation wall and footing meet to provide additional protection.
2. A 9" reinforcing strip of Blueskin WP 200 is applied at 90 degree changes in plane.
3. Terminations in the membrane are sealed using either Polybitume 570-05 Polymer Modified Sealing Compound or Blueskin WP 200.
4. See Technical Data Sheets for requirements of membrane protection.
